BEYOND THE INTERIOR

TROPICAL JEWEL

Tropical Jewel celebrates the influence of Malaysia's tropical environment with the abundance of lush green scenery surrounding AIRA Residence. The interior concept embodies a space that is vibrant yet sophisticated in its approach....the story of a tropical journey that references nature's beauty in every element of every room.

INSPIRED BY FORMS OF NATURE & TEXTURAL ENERGY

The natural organic shapes of tropical flowers and plants have been designed into the patterns of the carpets and forms of the furniture.

Interesting textures of wood and rattan that are abundantly found in the forest are used to treat the surface of walls and furniture, bringing a feeling of nature into the interior.
